Sensitivity: Confidential

Bettie,
All have been used except the 12 new devices w/chip received in last shipment. As mentioned in the last e-mail, all of these 12 function: 11 that will not download and one that will download.
Let me know if I can provide any other information.
Lori

Lori,

Thanks. How many of those have not been used?

With best regards,
Bettie

Bettie,
All the devices reported to you by Tracey with information provided by William have problems with downloading, but per William they all function in other respects. We have a total of 27 devices with chips. (Not including new devices w/chip from last shipment. Of the new devices we have 12 that function: 11 that will not download and one that can download). We also have 9 devices with out chips.
Please let us know if we can provide you with any other information.
Lori
